Product Series: 3-Button Remotes, Compact with Docking Station & Bowtie Style
To: All Genie® Professional Line Wholesalers, Dealers and Installers
Re: Programming to Openers from Nov 1995 to end of 1997

When trying to program G1TR-3 or G1CT390-3 remotes to openers from the Intellicode® era of Nov. 1995 to the end of 1997, there are specific buttons that must be used.

Model G1TR-3, p/n 37517S
Only the button farthest to the right will program to a Genie opener from Nov. 1995 to the end of 1997.

Model G1CT390-3, p/n 36484U
Only the button in the center will program to a Genie opener from Nov. 1995 to the end of 1997.

Currently, a new design is being implemented into the new 3-Button remotes that will allow the top two buttons to be programmed to a Genie opener from Nov. 1995 to the end of 1997. This is scheduled to be in production within the next several months and another bulletin will be released at that time including the appropriate date codes.
