

## PRODUCT INFORMATION BULLETIN

Date: March 9, 2012  
Number: 3746  
Division: Genie®  
Product Family: Residential Openers  
Product Series: IntelliG® Rails  
To: All Genie Professional Line Wholesalers, Dealers and Installers  
Re: Pulley Guard Removed on all IntelliG® Pro Rails

---

The pulley guard and its mounting screws on all IntelliG Pro rails have been removed as of a production date of 02/09/12. There is no structural value to this item. Its original intention was to prevent pulley damage from first time users who did not engage the bullet into the carriage prior to setting the limits.

Affected part numbers:

37060R	7' Chain Rail	37061R	7' Belt Rail
37060S	8' Chain Rail	37061S	8' Belt Rail
37060T	10' Chain Rail	37061W	9' Belt Rail
37060U	12' Chain Rail	37061T	10' Belt Rail
37060V	14' Chain Rail	37061U	12' Belt Rail
		37061V	14' Belt Rail

While this piece has been removed from the Pro rails listed above, the pulley guard will remain in production on the retail versions of these rails, the tensioner assembly service part number 37857R.S, and also on the training demo rail kits.
